Skills

A safety-centric and task-oriented individual dedicated to ensuring organized teamwork leads to timely decision making and accomplishment. My personal strengths also include an extensive background in Windows-based computer hardware and software troubleshooting, server administration and maintenance, and operationally checking radio and electronics equipment. Additionally, I currently possess an active DoD Secret Clearance, am 10-Hour OSHA Safety certified, and also a certified FAA Part 107 Small RUAS Pilot.

Experience

SigmaCorps Solutions / Data Manager

MAY 2022 - JUNE 2024, REMOTE/HYBRID

Also an Analyst for the company, I was in charge of a remote/hybrid team of 20-30 data collectors traveling to various Testing and Evaluation (T&E) events for the Marines. I had trained all 30 personnel in utilizing data collection equipment equating to thousands of dollars while ensuring the preventative maintenance of said equipment was adequately completed for continued use. I had also exponentially streamlined their current data collection processes by utilizing effective teaching methods and communication. By the end, I was one of the company's most elite employees and fostered a self-sufficient and self-teaching data collection team. Additionally within this role, I would also be responsible for helping read and interpret block wire diagrams and various schematics alongside different engineers, also of whom would request my analysis and assessments of their updated designs or fixes. I was additionally requested for my support in the troubleshooting and preventative/reactive maintenance of critical subsystems during development. With this I would also be helping guide personnel in understanding the processes of Systems Engineering and design.

SigmaCorps Solutions / Operator Instructor III

JUNE 2021 - MAY 2022, REMOTE/HYBRID

As an instructor for various counter-drone (C-UAS) defense weapons and systems, I lectured classes on the safety, installation, programming, maintenance, and repair of different electronic, hydraulic, and pneumatic systems and equipment. I ensured students and trainees' followed the appropriate outlines, handouts and texts - especially emphasizing on OSHA and ANSI standards, warning signs and symbols. I even administered written and practical exams and wrote performance reports to evaluate trainees'.

United States Marine Corps / Aviation Communication Systems Technician

JUNE 2016 - JUNE 2021, CAMP PENDLETON, CA

I was responsible for maintaining, repairing, inventorying, and cleaning \$4M+ of Harris, Thales, and Motorola tactical and commercial communications equipment. Also conducted electronics maintenance on 3 phase, 60 Hz 120/208 VAC and 24-30 VDC systems and subassemblies utilizing DMM's, ground clamps, and other electrical testing equipment. Additional experience with physical network establishment to include Cisco routers and switches, VMWare Virtual Machine deployment and management (including Linux), and Windows Active Directory.

Education

National University / AA, General Studies

NOVEMBER 2019 - APRIL 2021, ONLINE

Graduated with an Associate's in General Studies to include Psychology, College Trigonometry and Algebra, Interpersonal Communication, and Information Literacy. Graduated with a cumulative GPA of 3.97.

Airstreams Renewables, Inc. / Renewable Energy and Communications Tower Technician Program Certificate

MARCH 2021 - APRIL 2021, TEHACHAPI, CA

Completed accelerated training on various aspects of electrical, mechanical, and technical skills required to safely troubleshoot and service renewable energy and communication tower equipment with an emphasis on safety.

Awards

- Through hard work and dedication, I proved myself worthy for a manager position at SigmaCorps within only a year of working there (2021 - 2022).
- **July 2020** - Rank of Sergeant in the Marine Corps with a highly rated score amongst peers.
- **March 2018 & January 2019** - 2 Letters of Appreciation for superb professionalism and dedication to duty in effectively planning and preparing site setups and briefs which educated 36 senior civilian leaders, Marines, and Naval Officers on the importance of the integrated functionality between radio and data communication systems.
- **July 2018** - Certificate of Commendation for exemplary performance in the oversight and supervision of the maintenance and operation of radio and data communications within a Communications Chief position as a junior.
